

NTUA

HEP Cluster CMS Team

George Bakas

To Do

1. Network Sockets
 - a) Sockets were not connected to NTUA network
 - b) Sockets are now **connected**
 - c) Optical Fibre **not working** → new status on Friday 18/9
2. Decide on the Operating System
 1. Ubuntu 20 (desktop or server and why?)
 2. Scientific linux (CERN) 7
 3. 1 pc is set up with Ubuntu 20
3. Build ROOT on all computers
4. Have an 'e-group' with user names (NTUA) so that we can connect to the servers
5. Giannis suggested Round Robin so the servers work like Ixplus
 1. We need to talk with the NTUA Network center
